### Preparation and Storage

#### Stability & Storage:

It is recommended to store recombinant proteins at -20°C to -80°C for future use. Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

#### Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.

### Protein Background

Auxin Response Factors (ARFs) are a family of plant-specific transcription factors that play crucial roles in regulating plant growth and development. ARFs bind to auxin response elements (AuxREs) in the promoters of auxin-responsive genes, where they activate or repress transcription. They also recruit a second family of transcription factors, the Aux/IAA repressors, which confer an auxin response to the genes.
