Preparation and Storage

Stability & Storage:

It is recommended to store recombinant proteins at -20°C to -80°C for future use. Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.

Protein Background

TLIRWAILEA is position 344-353 of Foxp3 which is a member of a large forkhead family of related proteins. The peptide has minimal homology with other Foxp family members, such as Foxp1, 2 and 4, and it has also been shown to induce strong peptide-specific CD8+ T cell responses, which recognize Foxp3+/HLA-A*02:01+ cutaneous T lymphoma cells.
