

## Compound T129626

## Chemical Properties

CAS No. :

Formula: C58H94O26

Molecular Weight: 1207.36

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

## Biological Description

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## Preparing Stock Solutions

|       | 1mg       | 5mg       | 10mg      |
|-------|-----------|-----------|-----------|
| 1 mM  | 0.8283 mL | 4.1413 mL | 8.2825 mL |
| 5 mM  | 0.1657 mL | 0.8283 mL | 1.6565 mL |
| 10 mM | 0.0828 mL | 0.4141 mL | 0.8283 mL |
| 50 mM | 0.0166 mL | 0.0828 mL | 0.1657 mL |

Please select the appropriate solvent to prepare the stock solution, according to the solubility of the product in different solvents. Please use it as soon as possible.

Note: The dilution table applies only to solid products. For liquid products, please calculate the stock solution based on the stated concentration and/or density.
