

Botulinum toxin type B

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Botulinum toxin type B, an antigen-specific exotoxin produced by the anaerobic bacterium Clostridium botulinum, is utilized in the study of neck dystonia. It inhibits the release of Acetylcholine from the neuromuscular junction, causing relaxation paralysis or muscle weakening in the targeted muscle [1].
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
