

Truncated ADR58

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Truncated ADR58, derived by shortening full-length ADR58 from 71 bases to 31 bases, maintains comparable functional activity to its full-length counterpart. This compound acts as a potent and selective antagonist of human oncostatin M (OSM), effectively blocking OSM's interaction with the gp130 receptor and inhibiting OSM-mediated signaling. It is utilized in studying diseases related to rheumatoid arthritis [1].
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
