

Loxosceles Bergeri Venom

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Loxosceles Bergeri venom, derived from Loxosceles Bergeri, comprises a sophisticated blend of toxins featuring proteins, glycoproteins, and low molecular mass peptides. Identified protein classes within this venom include astacin-like metalloprotease, insecticidal peptides of low molecular mass, inhibitor cystine knot peptides (ICK), and phospholipase-D, with the enzyme sphingomyelinase D playing a pivotal role in necrosis development [1].
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins
