

## Loxosceles Pilosa Venom

## Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

## Biological Description

Description	Loxosceles Pilosa Venom, derived from Loxosceles Pilosa, comprises a sophisticated blend of proteins, glycoproteins, and low molecular mass peptides. This venom contains various protein classes such as astacin-like metalloprotease, insecticidal peptides of low molecular mass, inhibitor cystine knot peptides (ICK), and phospholipase-D. Notably, the enzyme sphingomyelinase D is pivotal for necrosis development [1].
Targets(IC50)	Others

**Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins**

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
