

Neuraminidase

Chemical Properties

CAS No. : 9001-67-6

Formula:

Molecular Weight:

Storage: Store at low temperature,Keep away from moisture
Powder: -20°C for 3 years | In solvent: -80°C for 1 year
Actual storage temperature shall be subject to the COA.

Biological Description

Description	Neuraminidase, Microorganism (Exo- α -sialidase) is a sialidase that catalyzes the hydrolysis of sialic acid, has antigenic properties, and assists in the separation of mature influenza viruses from the host cell to infect new cells.Sodium caseinates is used as a thickening and emulsifying agent in the food industry.
Targets(IC50)	Endogenous Metabolite
