

## Vulinacimab

## Chemical Properties

CAS No. : 2250342-36-8

Formula:

Molecular Weight:

Storage: Store at low temperature  
Store at -20°C

Actual storage temperature shall be subject to the COA.

## Biological Description

Description	Vulinacimab (REGN910, SAR153192) is a humanized monoclonal antibody targeting Vascular Endothelial Growth Factor Receptor 2 (VEGFR2). By binding with high affinity to VEGFR2, it blocks the interaction of various ligands, including VEGF-A, with the receptor, thereby inhibiting downstream pro-angiogenic and pro-survival signaling pathways. It is a key tool for studying tumor angiogenesis and VEGFR2-related pathologies.
Targets(IC50)	VEGFR
