Biological Description

Description	Deprodone propionate (RD20000) is a synthetic corticosteroid suitable for inflammation research.
Targets(IC50)	Immunology/Inflammation related
In vitro	With Deprodone propionate as the active ingredient, it can maximize and prolong its efficacy. This component exhibits no skin irritation and maintains stable physicochemical properties. Through the thickening effect of suspending agents, Deprodone propionate can sustain a stable suspension state [1].

Solubility Information

Solubility	DMSO: 200 mg/mL (499.36 mM), Sonication is recommended. (< 1 mg/ml refers to the product slightly soluble or insoluble)
