

Sirtratumab

Chemical Properties

CAS No. : 1824663-82-2

Formula:

Molecular Weight:

Storage: Store at low temperature
-20°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Sirtratumab (also known as AGS15C / Ha15-10ac12) is a human monoclonal antibody targeting SLITRK6. It is used in cancer research, particularly in tumor models with high SLITRK6 expression, to investigate the role of SLITRK6 in tumor growth, proliferation, migration, and other biological processes. As a candidate antibody for ADC development, an antibody-drug conjugate derived from Sirtratumab (Sirtratumab vedotin / AGS15E) has been developed to selectively deliver cytotoxic agents to SLITRK6-positive tumor cells, thereby enhancing targeting specificity.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
