

m-PEG-azide (MW 2000)

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Keep away from direct sunlight
Powder: -20°C for 3 years | In solvent: -80°C for 1 year
Actual storage temperature shall be subject to the COA.

Biological Description

Description	m-PEG-azide (MW 2000) is a PEG-based linker used in PROTACs to join two essential ligands, facilitating the selective degradation of target proteins through the ubiquitin-proteasome system within cells.
Targets(IC50)	Others,PROTAC Linker
In vitro	PROTACs feature two distinct ligands joined by a linker: one targets an E3 ubiquitin ligase, and the other, the target protein. They leverage the intracellular ubiquitin-proteasome system to selectively degrade target proteins[1].
