

Curcumol

Chemical Properties

CAS No. :	4871-97-0
Formula:	C ₁₅ H ₂₄ O ₂
Molecular Weight:	236.35
Storage:	Keep away from direct sunlight, Keep away from moisture Powder: -20°C for 3 years In solvent: -80°C for 1 year <small>Actual storage temperature shall be subject to the COA.</small>

Biological Description

Description	Curcumol ((-)-Curcumol), a pure monomer derived from Rhizoma Curcumaeis, exhibits antitumor activities.
Targets(IC50)	Apoptosis,JAK
In vivo	In fibroblast-like synoviocytes, Curcumol can inhibit cell proliferation and DNA synthesis, contributing to the improvement of rheumatoid arthritis. In human lung adenocarcinoma cells, Curcumol induces cell death through the induction of G(2)/M phase arrest, nuclear fragmentation, externalization of phosphatidylserine, and rapid translocation of Bax from the cytoplasm to the mitochondria.

Solubility Information

Solubility	H ₂ O: < 1 mg/mL (insoluble or slightly soluble), Ethanol: 44 mg/mL (186.16 mM),Sonication is recommended. DMSO: 44 mg/mL (186.16 mM),Sonication is recommended. (< 1 mg/ml refers to the product slightly soluble or insoluble)
In vivo Formulation	10% DMSO+90% Corn Oil: 2 mg/mL (8.46 mM),Sonication is recommended. <i>Please add the solvents sequentially, clarifying the solution as much as possible before adding the next one. Dissolve by heating and/or sonication if necessary. Working solution is recommended to be prepared and used immediately. The formulation provided above is for reference purposes only. In vivo formulations may vary and should be modified based on specific experimental conditions.</i>

Preparing Stock Solutions

	1mg	5mg	10mg
1 mM	4.231 mL	21.1551 mL	42.3101 mL
5 mM	0.8462 mL	4.231 mL	8.462 mL
10 mM	0.4231 mL	2.1155 mL	4.231 mL
50 mM	0.0846 mL	0.4231 mL	0.8462 mL

Please select the appropriate solvent to prepare the stock solution, according to the solubility of the product in different solvents. Please use it as soon as possible.

Note: The dilution table applies only to solid products. For liquid products, please calculate the stock solution based on the stated concentration and/or density.
