

Dengue virus DENV-2 (Strain New Guinea C) Capsid protein/DENV-C Protein (His)

General Information

Synonyms:	death-domain associated protein
Protein Construction:	A DNA sequence encoding the Capsid protein C [Dengue virus (DENV) (type 2, strain New Guinea C)] (AHF52833.1)(Met1-Arg100) was expressed with a polyhistidine tag at the N-terminus. Predicted N terminal: Met
Species:	DENV
Expression Host:	E. coli
Accession:	W0GCK5
Molecular Weight:	14 kDa (predicted)

QC Testing

Biological Activity:	Activity testing is in progress. It is theoretically active, but we cannot guarantee it. If you require protein activity, we recommend choosing the eukaryotic expression version first.
Purity:	> 90 % as determined by SDS-PAGE.
Endotoxin:	Please contact us for more information.
Formulation:	Lyophilized from a solution filtered through a 0.22 µm filter, containing PBS, pH 7.4. Typically, a mixture containing 5% to 8% trehalose, mannitol, and 0.01% Tween 80 is incorporated as a protective agent before lyophilization.

Preparation and Storage

Reconstitution:
A Certificate of Analysis (CoA) containing reconstitution instructions is included with the products. Please refer to the CoA for detailed information.

Stability & Storage:

It is recommended to store recombinant proteins at -20°C to -80°C for future use. Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.
