

Galectin-8 Protein, Human, Recombinant (GST)

General Information

Synonyms:	PCTA1;Po66-CBP;PCTA-1;lectin, galactoside-binding, soluble, 8;Gal-8
Protein Construction:	A DNA sequence encoding human LGALS8 (AAF19370.1) (Met 1-Trp 317) was fused with the GST tag at the N-terminus. Predicted N terminal: Met
Species:	Human
Expression Host:	E. coli
Accession:	AAF19370.1
Molecular Weight:	62.7 kDa (predicted); 60 kDa (reducing conditions)

QC Testing

Biological Activity:	Measured by its ability to agglutinate human red blood cells. The ED50 for this effect is typically 0.2-1 µg/ml.
Purity:	> 70 % as determined by SDS-PAGE
Endotoxin:	Please contact us for more information.
Formulation:	Lyophilized from a solution filtered through a 0.22 µm filter, containing 50 mM Tris, 0.1 M NaCl, pH 8.0. Typically, a mixture containing 5% to 8% trehalose, mannitol, and 0.01% Tween 80 is incorporated as a protective agent before lyophilization.

Preparation and Storage

Reconstitution:

A Certificate of Analysis (CoA) containing reconstitution instructions is included with the products. Please refer to the CoA for detailed information.

Stability & Storage:

It is recommended to store recombinant proteins at -20°C to -80°C for future use. Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.
