

Glycophorin A Protein, Human, Recombinant (His)

General Information

Synonyms:	glycophorin A (MNS blood group);HGpMiV;CD235a;MNS;PAS-2;GPSAT;HGpMiXI;HGpSta(C);GPA;MN;GPERik
Protein Construction:	A DNA sequence encoding the human GYP A (P02724) (Met1-Glu91) was expressed with a C-terminal polyhistidine tag. Predicted N terminal: Ser 20
Species:	Human
Expression Host:	HEK293 Cells
Accession:	P02724
Molecular Weight:	9.4 kDa (predicted); 35-45 and 20 kDa (reducing condition, due to glycosylation)

QC Testing

Biological Activity:	Activity testing is in progress. It is theoretically active, but we cannot guarantee it. If you require protein activity, we recommend choosing the eukaryotic expression version first.
Purity:	≥ 95% as determined by SDS-PAGE. ≥ 95 % as determined by SEC-HPLC.
Endotoxin:	< 1.0 EU/μg of the protein as determined by the LAL method.
Formulation:	Lyophilized from a solution filtered through a 0.22 μm filter, containing PBS, pH 7.4. Typically, a mixture containing 5% to 8% trehalose, mannitol, and 0.01% Tween 80 is incorporated as a protective agent before lyophilization.

Preparation and Storage

Reconstitution:

A Certificate of Analysis (CoA) containing reconstitution instructions is included with the products. Please refer to the CoA for detailed information.

Stability & Storage:

It is recommended to store recombinant proteins at -20°C to -80°C for future use. Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.
