

CCL21a Protein, Mouse, Recombinant

General Information

Synonyms:	ALP;chemokine (C-C motif) ligand 21A (serine);SLC;Tca4;SCYA21a;CKb9;Scya21b;6CKBAC2;Scya21;plt;6Ckine
Protein Construction:	A DNA sequence encoding the mouse CCL21A (NP_035254.1) (Met1-Gly133) was expressed. Predicted N terminal: Ser 24
Species:	Mouse
Expression Host:	Baculovirus Insect Cells
Accession:	P84444
Molecular Weight:	12.1 kDa (predicted)

QC Testing

Biological Activity:	Activity testing is in progress. It is theoretically active, but we cannot guarantee it. If you require protein activity, we recommend choosing the eukaryotic expression version first.
Purity:	> 95 % as determined by SDS-PAGE.
Endotoxin:	< 1.0 EU/ μ g of the protein as determined by the LAL method.
Formulation:	Lyophilized from a solution filtered through a 0.22 μ m filter, containing 40 mM Tris, 300 mM NaCl, pH 7.4. Typically, a mixture containing 5% to 8% trehalose, mannitol, and 0.01% Tween 80 is incorporated as a protective agent before lyophilization.

Preparation and Storage

Reconstitution:

A Certificate of Analysis (CoA) containing reconstitution instructions is included with the products. Please refer to the CoA for detailed information.

Stability & Storage:

It is recommended to store recombinant proteins at -20°C to -80°C for future use. Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.
