

Nectin-4 Protein, Mouse, Recombinant (hFc)

General Information

Protein Construction:	A DNA sequence encoding the Mouse NECTIN4 (Q8R007-1) (Met1-Ser347) was expressed with the fused Fc region of human IgG1 at the C-terminus. Predicted N terminal: Gly 31
Species:	Mouse
Expression Host:	HEK293 Cells
Accession:	Q8R007-1
Molecular Weight:	61.04 kDa (predicted); 77.93 kDa (reducing conditions)

QC Testing

Biological Activity:	Immobilized Recombinant Mouse NECTIN4/Nectin 4 Protein (Fc Tag) (Cat#TMPY-06509) at 2 µg/mL (100 µL/well) can bind Anti-Nectin4 Antibody, human IgG1, the EC50 is 18-54 ng/mL.
Purity:	> 95 % as determined by SDS-PAGE.
Endotoxin:	< 1.0 EU/µg of the protein as determined by the LAL method.
Formulation:	Lyophilized from a solution filtered through a 0.22 µm filter, containing PBS, pH 7.4. Typically, a mixture containing 5% to 8% trehalose, mannitol, and 0.01% Tween 80 is incorporated as a protective agent before lyophilization.

Preparation and Storage

Reconstitution:

A Certificate of Analysis (CoA) containing reconstitution instructions is included with the products. Please refer to the CoA for detailed information.

Stability & Storage:

It is recommended to store recombinant proteins at -20°C to -80°C for future use. Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.
