

Siglec-9 Protein, Human, Recombinant (His)

General Information

Synonyms:	OBBP-LIKE;CD329;FOAP-9;CDw329;siglec-9
Protein Construction:	A DNA sequence encoding the Human SIGLEC9 (Q9Y336-1) (Met1-Gly348) was expressed with a polyhistidine tag at the C-terminus. Predicted N terminal: Gln 18
Species:	Human
Expression Host:	HEK293 Cells
Accession:	Q9Y336-1
Molecular Weight:	37.48 kDa (predicted); 61.92 kDa (reducing conditions)

QC Testing

Biological Activity:	Activity testing is in progress. It is theoretically active, but we cannot guarantee it. If you require protein activity, we recommend choosing the eukaryotic expression version first.
Purity:	≥ 90 % as determined by SDS-PAGE.
Endotoxin:	< 1.0 EU/μg of the protein as determined by the LAL method.
Formulation:	Lyophilized from a solution filtered through a 0.22 μm filter, containing PBS, 500 mM NaCl, 0.2% CHAPS, 10%Trehalose, 0.1M Arg, pH 7.0.Typically, a mixture containing 5% to 8% trehalose, mannitol, and 0.01% Tween 80 is incorporated as a protective agent before lyophilization.

Preparation and Storage

Reconstitution:

A Certificate of Analysis (CoA) containing reconstitution instructions is included with the products. Please refer to the CoA for detailed information.

Stability & Storage:

It is recommended to store recombinant proteins at -20°C to -80°C for future use. Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.
