

Buspirone hydrochloride

Chemical Properties

CAS No. :	33386-08-2
Formula:	C ₂₁ H ₃₂ ClN ₅ O ₂
Molecular Weight:	421.96
Storage:	Powder: -20°C for 3 years In solvent: -80°C for 1 year Actual storage temperature shall be subject to the COA.

Biological Description

Description	Buspirone hydrochloride (Buspar) is a 5HT(1A) receptor agonist, used to treat generalized anxiety disorder (GAD).
Targets(IC50)	Reactive Oxygen Species,5-HT Receptor,Dopamine Receptor,ROS
In vitro	Buspirone, a clinically effective non-benzodiazepine anxiolytic drug, causes inhibition of firing of these neurons when given by intravenous (ED ₅₀ = 0.011 mg/kg, i.v.), intraperitoneal (ED ₅₀ = 0.088 mg/kg, i.p.), and intragastric (effective dose = 1.0-20.0 mg/kg, i.g.) injection. Buspirone also inhibits these cells when it is administered to the outside of recorded neurons by microiontophoresis. [1] Buspirone is eliminated primarily by oxidative metabolism, which produces several hydroxylated metabolites, including 5-hydroxy-buspirone and 1-pyrimidinylpiperazine. [2]

Solubility Information

Solubility	H ₂ O: 42.2 mg/mL (100.01 mM),Sonication is recommended. DMSO: 61.88 mg/mL (146.65 mM),Sonication is recommended. (< 1 mg/ml refers to the product slightly soluble or insoluble)
In vivo Formulation	10% DMSO+40% PEG300+5% Tween 80+45% Saline: 2 mg/mL (4.74 mM),Sonication is recommended. <i>Please add the solvents sequentially, clarifying the solution as much as possible before adding the next one. Dissolve by heating and/or sonication if necessary. Working solution is recommended to be prepared and used immediately. The formulation provided above is for reference purposes only. In vivo formulations may vary and should be modified based on specific experimental conditions.</i>

Preparing Stock Solutions

	1mg	5mg	10mg
1 mM	2.3699 mL	11.8495 mL	23.6989 mL
5 mM	0.474 mL	2.3699 mL	4.7398 mL
10 mM	0.237 mL	1.1849 mL	2.3699 mL
50 mM	0.0474 mL	0.237 mL	0.474 mL

Please select the appropriate solvent to prepare the stock solution, according to the solubility of the product in different solvents. Please use it as soon as possible.

Note: The dilution table applies only to solid products. For liquid products, please calculate the stock solution based on the stated concentration and/or density.
