Biological Description

Description	Propargyl-PEG4-O-C1-NHS ester, also known as compound 8, is a polyethylene glycol (PEG)-based linker that serves as a reactive functional group for the synthesis of proteolysis targeting chimeras (PROTACs).
Targets(IC50)	Others,PROTAC Linker
In vitro	PROTACs, consisting of two ligands connected by a linker—one for an E3 ubiquitin ligase and the other for the target protein—utilize the intracellular ubiquitin-proteasome system to selectively degrade target proteins.
