## Biological Description

Description	Boc-NH-PEG5-propargyl is a PEG-based linker for PROTACs, facilitating the binding of two essential ligands necessary for PROTAC formation. This linker enables selective protein degradation by leveraging the ubiquitin-proteasome system within cells.
Targets(IC50)	Others,PROTAC Linker
In vitro	PROTACs feature two distinct ligands linked together: one targets an E3 ubiquitin ligase, while the other binds to the target protein. They leverage the intracellular ubiquitin-proteasome system to selectively degrade target proteins [1].
