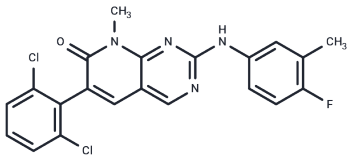
TargetMol
YOUR TARGET MOLECULES

PD180970

Chemical Properties



CAS No. : 287204-45-9

Formula: C21H15Cl2FN4O

Molecular Weight: 429.27

Appearance: no data available

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Biological Description

Description	PD180970 is an inhibitor of Bcr-Abl with IC50s of 5 nM, 0.8 nM and 50 nM for the autophosphorylation of p210Bcr-Abl, Src and Kit. PD180970 can be used in studies about chronic myelogenous leukemia.
Targets(IC50)	Bcr-Abl,Src,c-Kit
In vitro	In K562 cells, PD180970 (0.5 μM) induces apoptosis and causes cell death. The IC50 values are 170, 80, and 80 nM for the tyrosine phosphorylation of p210Bcr-Abl, Gab2, and CrkL. PD180970 significantly inhibits the purified recombinant Abl tyrosine kinase activity with an IC50 of 2.2 nM[1]. In the human K562 CML cells, PD180970 inhibits the activity of Stat5 DNA-binding with an IC50 of 5 nM[2].
In vivo	In Male C57BL/6J mice injected with MPTP, intraperitonial injection of PD180970 (5mg/kg) decreased number of activated microglia on activation by MPTP and reduces the Iba1 expression intensity in activated microglia[1].

Solubility Information

Solubility	DMSO: 90.0 mg/mL (209.7 mM),Sonication is recommended. (< 1 mg/ml refers to the product slightly soluble or insoluble)

Preparing Stock Solutions

	1mg	5mg	10mg
1 mM	2.3295 mL	11.6477 mL	23.2954 mL
5 mM	0.4659 mL	2.3295 mL	4.6591 mL
10 mM	0.233 mL	1.1648 mL	2.3295 mL
50 mM	0.0466 mL	0.233 mL	0.4659 mL

Please select the appropriate solvent to prepare the stock solution, according to the solubility of the product in different solvents. Please use it as soon as possible.
