

Brain-Derived Acidic Fibroblast Growth Factor (1-11) (bovine) (trifluoroacetate salt)

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Appearance: no data available

Storage: keep away from moisture
Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Biological Description

Description	Brain-derived acidic fibroblast growth factor (brain-derived aFGF) (1-11) is a peptide fragment of brain-derived aFGF. Brain-derived aFGF is an angiogenic vascular endothelial cell mitogen produced in bovine brain that has sequence homology to interleukin-1. aFGF (1-11) corresponds to amino acid residues 1-11 of the full length peptide.
