Biological Description

Description	3-hydroxy Palmitic acid methyl ester (3-hydroxy PAME) is an esterized long-chain fatty acid involved in quorum sensing in <i>R. solanacearum</i> , a bacteria that causes lethal wilting in plants. 3-hydroxy-PAME (175 nM) increases levels of PhcA-regulated virulence factors, greater than 20-, 30-, and 25-fold for EPS I, EGL, and PME, respectively, in the AW1-83 strain of <i>R. solanacearum</i> .
