

Penicillin G potassium

Chemical Properties

CAS No. :	113-98-4
Formula:	C ₁₆ H ₁₇ KN ₂ O ₄ S
Molecular Weight:	372.48
Appearance:	no data available
Storage:	Powder: -20°C for 3 years In solvent: -80°C for 1 year

Biological Description

Description	Penicillin G potassium (Benzylpenicillin potassium) is the potassium salt form of penicillin G, a broad-spectrum penicillin antibiotic.
Targets(IC50)	Anti-infection,Antibacterial,Antibiotic
In vivo	Potassium penicillin G administered in drinking water is effective in reducing mortality associated with <i>S. suis</i> infection and reducing tonsillar carriage of <i>S. suis</i> that may lead to disease and be a source of pig-to-pig transmission of infection[1].
Animal Research	Fresh stock solution was prepared twice daily by an individual who was not involved with assessment of the study pigs. The test article was administered via the drinking water for 5 d over 2 periods of treatment. The first treatment period commenced on the day of weaning, when the pigs were moved into the nursery barns (Day 1) and ended on Day 5. The second treatment period began on Day 21 and ended on Day 25. The Control group did not receive treatment[1].

Solubility Information

Solubility	DMSO: 16.67 mg/mL (44.75 mM),Sonication is recommended. (< 1 mg/ml refers to the product slightly soluble or insoluble)
------------	--

Preparing Stock Solutions

	1mg	5mg	10mg
1 mM	2.6847 mL	13.4235 mL	26.8471 mL
5 mM	0.5369 mL	2.6847 mL	5.3694 mL
10 mM	0.2685 mL	1.3424 mL	2.6847 mL
50 mM	0.0537 mL	0.2685 mL	0.5369 mL

Please select the appropriate solvent to prepare the stock solution, according to the solubility of the product in different solvents. Please use it as soon as possible.
