

XP-524

Chemical Properties

CAS No. : 2344825-52-9
Formula: C₃₀H₂₈N₆O₃S
Molecular Weight: 552.65
Appearance: no data available
Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Biological Description

Description	XP-524 is a potent inhibitor of BET and EP300. XP-524 has significant tumouricidal effects in vivo, preventing KRAS-induced tumour transformation in vivo and prolonging survival in two aggressive PDAC transgenic mouse models. XP-524 also enhances the expression of its own peptide and recruitment of tumour cells to cytotoxic T lymphocytes. XP-524 has shown potential for research in pancreatic ductal adenocarcinoma (PDAC).
