

Tomivosertib HCl

Chemical Properties

CAS No. : 1849590-02-8
Formula: C₁₇H₂₁ClN₆O₂
Molecular Weight: 376.845
Appearance: no data available
Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Biological Description

Description	Tomivosertib, also known as eFT508 is a MNK1/2 inhibitor. Tomivosertib binds to and inhibits the activity of MNK1 and 2. This prevents MNK1/2-mediated signaling, and inhibits the phosphorylation of certain regulatory proteins, including eukaryotic translation initiation factor 4E (eIF4E), that regulate the translation of messenger RNAs (mRNAs) involved in tumor cell proliferation, angiogenesis, survival and immune signaling.
