

## PROTAC CDK9 degrader-7

### Chemical Properties

CAS No. : 2935587-90-7

Formula:

Molecular Weight:

Appearance: no data available

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

### Biological Description

|             |                                                                                                                                                                                                        |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description | PROTAC CDK9 degrader-7 is a proteolysis-targeting chimera (PROTAC) specifically designed to target and mediate the degradation of Cyclin-Dependent Kinase 9 (CDK9) through the proteasome pathway [1]. |
