

## LysoFos Glycerol 16

### Chemical Properties

CAS No. : 326495-22-1  
Formula: C<sub>22</sub>H<sub>44</sub>NaO<sub>9</sub>P  
Molecular Weight: 506.549  
Appearance: no data available  
Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

### Biological Description

|             |                                                                                                                                                         |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description | LysoFos Glycerol 16 is a useful organic compound for research related to life sciences. The catalog number is TF0118 and the CAS number is 326495-22-1. |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|

### Solubility Information

|            |                                                                                        |
|------------|----------------------------------------------------------------------------------------|
| Solubility | H <sub>2</sub> O: 10%<br>(1 mg/ml refers to the product slightly soluble or insoluble) |
|------------|----------------------------------------------------------------------------------------|

### Preparing Stock Solutions

|       | 1mg       | 5mg       | 10mg       |
|-------|-----------|-----------|------------|
| 1 mM  | 1.9741 mL | 9.8707 mL | 19.7414 mL |
| 5 mM  | 0.3948 mL | 1.9741 mL | 3.9483 mL  |
| 10 mM | 0.1974 mL | 0.9871 mL | 1.9741 mL  |
| 50 mM | 0.0395 mL | 0.1974 mL | 0.3948 mL  |

Please select the appropriate solvent to prepare the stock solution, according to the solubility of the product in different solvents. Please use it as soon as possible.
