

Soyasaponin Ab

Chemical Properties

CAS No. :	118194-13-1
Formula:	C ₆₇ H ₁₀₄ O ₃₃
Molecular Weight:	1437.52
Appearance:	no data available
Storage:	Powder: -20°C for 3 years In solvent: -80°C for 1 year

Biological Description

Description	Soyasaponin Ab may represent a viable candidate for effective vaccine adjuvant, TLR4 receptor dependent pathway may be involved in immune stimulatory effects of soyasaponin Ab.
Targets(IC50)	NOS,NF-κB,COX
In vitro	Soyasaponin Ab inhibited colon shortening, myeloperoxidase activity, the expression of cyclooxygenase-2 (COX-2) and inducible nitric oxide synthase (iNOS), and activation of the transcription factor nuclear factor-κB (NF-κB). Soyasaponin Ab (1, 2, 5, and 10 μM) inhibited the production of NO (IC ₅₀ = 1.6 ± 0.1 μM) and prostaglandin E ₂ (IC ₅₀ = 2.0 ± 0.1 ng/mL), the expression of tumor necrosis factor (TNF)-α (IC ₅₀ = 1.3 ± 0.1 ng/mL), interleukin (IL)-1β (IC ₅₀ = 1.5 ± 0.1 pg/mL), and toll-like receptor (TLR)4, and the phosphorylation of interleukin-1 receptor-associated kinase (IRAK)-1 in LPS-stimulated peritoneal macrophages. Soyasaponin Ab weakly inhibited the phosphorylation of ERK, JNK, and p38. Soyasaponin Ab significantly reduced the binding of Alexa-Fluor-594-conjugated LPS to peritoneal macrophages. Soyasaponin Ab did not affect TLR4 expression or LPS-induced NF-κB activation in TLR4 siRNA-treated peritoneal macrophages (knockdown efficiency of TLR4 > 94%).

Solubility Information

Solubility	DMSO: 100 mg/mL (69.56 mM) (< 1 mg/ml refers to the product slightly soluble or insoluble)
